Session summary

The circuit is Hanoi is a love hit hate it circuit. Tricky first, boring second and super fast third sector. Almost no chances to overtake, except on the straights. This session was a dry one with for some a lonely drive and for some a challenging one. Also a track where the time difference is high. If we compare it with Austria or Brazil fo example, the pack is much closer on those tracks. Reason must be that drivers don't race many times in Vietnam.

The first lap, corners, were hectic. One reason was that **Samuel** lost connection and AI was controlling his car till turn 2. During the VSC there was some unlucky trouble for **Berry** and **Lexidas**.

During the VSC the delta was high. Overtaking is possible during high delta to minimize the gap. All, keep close attention to this. Try to keep it at 1 second max.

After this poor first lap the rest went steady. No connection issues or incidents. Just a normal good session.

Please check the details per lap. If you have question don't hesitate to ask them.

The next race in China will be much closer is our prediction. Fun track and maybe with some rain. This would be first rainy session this season.

Thanks for reading and stay healthy!

Details per lap

L1-T1 **Huub** and **Stef** on their double debut. Unlucky **Huub** hitting his brother teammate in the back causing wing damage. Chain-reacting at **Timo** causing both McLaren drivers the same problems.

L1-T5 **VSC** **GA LegendZz** hits **Lexidas** and this resulted in wing damage. This is worth a license point. We think the awareness wasn't there.

Similar case for **Huub** on **Berry**. Also a license point for the poor awareness level in this incident.

L7-T19 **GA LegendZz** retires the car.

L11-T2 **EconomicBerry** retires the car.

L17 **Huub** got a flat trye. Wanted to get the maximum out of the tyres after his Lap 1 pit stop. It didn't work out and he retired the car.

Details per driver / team **Note: not everyone will be mentioned.*

Huub and Stef

We are very happy you two made it possible to race together. Unlucky race for both. Never the less we are looking forward to next races!
Tip for Stef: when the VSC notice occurs, don't push the brake to hard. Someone else can be right behind you. Check the clip of WTZFLEX.

DenJef, Timo, Cringyy and Graat.

Probably one of the most boring races of their careers.

Lexidas and Iepovich NL

Close late battle. At the end of the long straight a (late) attempt to overtake. The Mercedes driver not willing to give room and closed the door by ignoring the red arrows. Was this on purpose to let the Renault driver know his attempt was too late?

GEIT Samuel, Deauj and WTZFLEX

That save in L6 T2 was great **Samuel**! Great battle seen between the three drivers. Also great comeback **Deauj**. Good race!

Stryher

We think it was a good session. Even if we have no footage. Maybe you can stream on Twitch or make some clips. That way we can see some things and give some comments! Thanks!

This is for all drivers of course!
