

## Session summary

The Dutch Grand Prix went very well before the session connection problems. Not everyone had problems. **Lexidas**, **Cringyy** and **WTZFLEX** lost their connection and lost time or even the race because of it. A shame for this in general good race.

If someone disconnects and can not rejoin, please restart the game and try again. If this not works, send a message in the Xbox app to ask for an invite. This worked for **Lexidas** and **WTZFLEX** this race.

The fastest lap was set by the AI of **Escaapo**. After research we set the fastest lap to **DenJef** because the time set was impossible and looked like a glitched time.

Strong performance for both Mercedes and Red Bull. Nice 2<sup>nd</sup> place for **DHR Graat!**

Still Ferrari is on the top (with only one driver)!

Next track is Spain!

Take care and see you next week!

## Details per lap

L1-T1 SC **GEiT Samuel** hits Lexidas on the right, hits the wall. This caused **GA LegendZz**, **Escapoo** and **WTZFLEX** trouble. No penalties needed in this incident.

L3-T14 At the restart **Timo**, **MarkedCarp** and **Lando** crashed. **Timo** and **Carp** got a DNF. **Lando** damage. Cold tyres....

L15-T10/14 **GA LegendZz** lost control, got damage and retires the car in the pits.

L20-T2 **Stef** got contact with **Berry**. Racing incident as **Berry** could no do anything about it.

L20-T9 **DenJef** not taking advantage of Stef' spins as he lost his car in turn 9. Podium gone.

At this stage lot of lost connections.

## Details per driver / team *\*Note: not everyone will be mentioned.*

**Stef and Cringyy**  
Congrats with you first win. It was with a little luck of the connection issues **Cringyy** struggled with, but besides that you were very quick. **DenJef** was impressed. Keep up the good work! The points that **Cringyy** has obtained after the connection loss will remain because it was likely that these points would have been achieved in any case.

**Berry**  
The strategy of the Medium Red was a brave on. Great job for this race. Too bad about the connection loss of **WTZFLEX**. Maybe he could battle you some more.

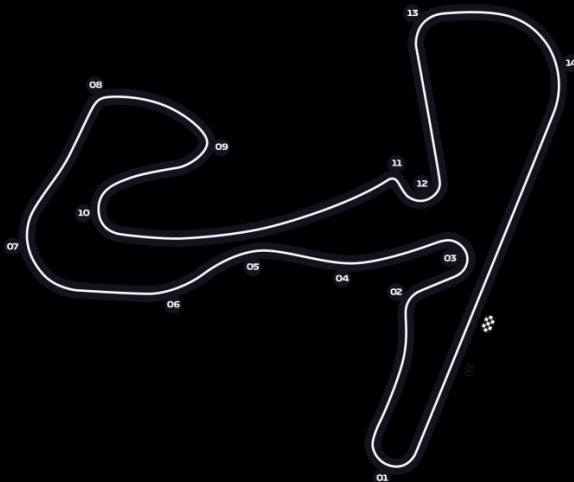

**MarkedCarp**  
Carp, good to have you back. Too bad of the DNF after the SC, but we believe in strong next races!

**Lexidas and GEiT Samuel**  
At the end there was some discussion about taking over or not. As we mentioned in the last report drivers should not be paying attention on the time penalties made by others. Those penalties could be corrected if something occurred in a way that a correction is needed. So with that said it is not always sure that a penalty is correct and the position is safe. And we believe drivers always have to get the drivers mentality, no matter the penalties that are visible after the drivers Gamertag. Example of this was the last corner of China between **Huub** and **WTZFLEX**.

**GA LegendZz**  
We see some improvement this race in terms of awareness. There were a few moments that were worth to be discussed. We want to know about your point of view. With no reply we can not learn. If there is no discussion or feedback from drivers it can have consequences for continuing racing in this league. Be proactive and get involved.

**Fourie**  
Good news about our friend **Riaan Fourie**. He is on the better hand. He is still in the hospital and treated with care, but he is on the better hand. We hope to see you soon back on the grid. We wish you all the best in your recovery. The points **Berry** won in your car will be added on your sheet on his request.

Stray Strong!
