

## Session summary

The Hungaroring is a fast and dangerous track. Hard to overtake and a mistake is easily made.

This session was a good one. The Q3 was close. The difference between #1 and #10 was 0.5 sec.

The race was a clean one. Not many incidents between drivers. Most of all incidents one car incident. Great job for everyone.

Details are mentioned in the section on your right.

**Update on last report at UK:**

The license point for **Escaapo** will be deleted. It was **Stef** that hit **Fourie**. But if we watch the clip of **Stef** and **WTZFLEX** it looked like a connection issue. This can happen sometimes between drivers living in other regions in the world. The hit was minor, or not at all, so there will be no consequences for it.

The turn of **Escaapo** was bad. This is worth a warning.

## Details per lap

L1-T1 **SC** **TheArtifact** lost control. To much throttle and spins in the grass. A miracle he hit no other cars. SC deployed.

L4 **WTZFLEX** spins two times in this round.

L6-T7 **EconmicBerry** spins, got damage and had to pit for a new wing.

L11-T13 **Fourie** spins. Yellow flag.

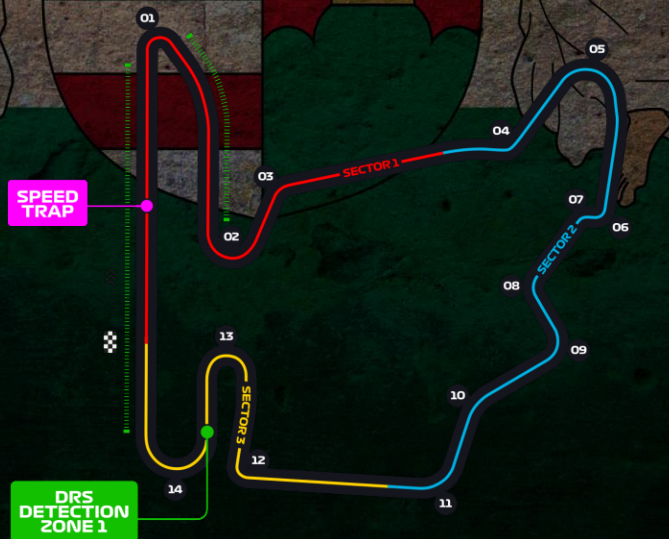

L17-T4 **Timo** and **Cringyy** involved. Racing incident. No footage.

L20-T4 This must be a similar incident. This time with **Badslipper** and **Escaapo**. Little room, small corner, and wanted to give as many space as possible, like **Timo** and **Cringyy** agreed on in the Xbox Chat.

L23-T1 **GEIT Samuel** Rich and Overtake combined caused a spin and wing damage on the right wall. Yellow flag.

L32-T14 **Berry** spins at the last corner. DNF. Yellow flag.

L33-T5 **WTZFLEX** spins. Yellow flag.

## Details per driver / team \*Note: not everyone will be mentioned.

### Timo and Cringyy

The number 1 and 2 on the leaderboard. With a poor Q he had a great comeback in the first lap. **Timo** with his fresh medium compound pitting in L17 and giving his biggest rival a battle at the pit exit. During the battle he lost control at turn 4. A racing incident and already spoken about with the two drivers involved. Sportsmanship top-class guys. Driver of the day for **Timo** for that great comeback!

### Badslipper99

AKA **DSZ x Scopezz**. Back on track with a fresh state of mind! Welcome back William. Good to have you back on track!

### Fourie and WTZFLEX

A disappointing start of the race for both but a very good pace at the end. Similar speed, hard times to get closer and further. Also with **Escaapo** and **Lando** in range, great pace from all drivers.

### Huub

The clip we have seen after your hotlap in Qualy shows a strange way of accelerating. Because of it you spin on track and hitting the pit wall. With this behaviour you jeopardize others hotlap. We kindly ask you and everyone else not to do this so we can minimize incidents.

### Stef and Iepovich

During the VSC **Stef** gets a 5 second time penalty for hitting **Iepovich**. He asks for correction. We will not correct this time on the end result. Reason one is that time ` by the game will not be corrected as stated in the guide (only paid by others if needed). Second reason is that this happens in L1. With 34 laps to go anything can happen. The 5 seconds stop in the pits served changes the whole outcome of the race. So it's not logical to apply a correction. We can not know what would have happened if not served. You could have got an DNF for example in another incident. It's just bad luck and we hope the next game solves this "bug".

### Lexidas

During a SC it is not allowed to pass others. It's a SC condition after all. Only if the delta is at a level that there is no other choice to overtake. The overtake on **Berry** is therefore for us an unexplainable attempt to win a position. This is worth a warning.

### TheArtifact

Strategywise nice one. The same that **WTZFLEX** had in mind. The whole race on hard tyres and tyre wear of 80%. Nice job, well done this race!
